## ORIGINAL

ORIGINAL APPLICATION FOR PERMIT AMENDED Serial No. 9330 TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA

Date of first receipt and filing in State Engineer's office Sept. 9, 1930 Returned to applicant for correction MAR -9 93 Corrected application filed MAR -9 93
The undersigned Truckee-Carson Irrigation District, having its
offices in the City of Fallon , County of Churchill ,
State of Nevada , hereby make S application for
permission to appropriate the public waters of the State of Nevada, as
hereinafter stated. (If applicant is a corporation, give date and place
of incorporation.) Organized under the laws of Nevada in November, 1918.
L. The source of the proposed appropriation is Truckee River and Name of stream, take, or other source
its tributaries
2. The amount of water applied for is 1500 second-feet.
The water to be used for irrigation and domestic purposes.    Integration, power, mining, manufacturing, domestic, or other use
. The water is to be diverted from its source at the following point:
Dam now located in channel of Truckee River at the following point;  Describe as being within a 40-acre subdivision of public survey, or by course and distance to a section corner. If on unsurveyed land, it should be so stated.
NET SWT of Sec. 19, T. 20 N., R. 23 E., M.D.M.
IF THE WATER IS TO BE USED FOR IRRIGATION, SUPPLY THE FOLLOWING INFORMATION:
a) Number of acres to be irrigated is
b) Description of land to be irrigated T. 21 N., R. 29, 30, 31 E.;  Describe by kgal subdivision, or if on unsurvered land it about
T. 20 N. R. 28, 29, 30, 31 E.: T. 19 N. R. 27, 28, 29, 30, 31 E.: T. 18 N. be so stated and a description provided in accordance with special instruction from the State Engineer when application is retorned for correction.
R. 27, 28, 29, 30 E.; T. 17 N., R. 28,29,30 E., M.D.M.
c) Use will begin about Jan. 1 and end about Dec. 31 of each year.
IF WATER IS TO BE USED FOR POWER, MINING, STOCK WATERING, OR OTHER USE, SUPPLY THE FOLLOWING INFORMATION:
d) Power to be developed is horsepower.
Works to be located
Point of return of water to stream  Describe in same manuer as point of diversion.
g) State number and kinds of animals to be watered
a) Use will begin about and end about, of each year.
.) Remarks

### INSTRUCTIONS TO APPLICANTS

Application should be made out in detail on the form prescribed by the State Engineer. Applications should be typewritten or filled out with ink.

An application is not a permit to appropriate water until after its approval by the State Engineer. Upon approval (or rejection) of any applicate a copy of the original application with such approval or rejection endorsed thereon, will be returned to the applicant. The terras of the permit will on the endorsement, and be a guide for the applicant.

The following rules should be complied with in making application:

Under Question No. 1.—Where the source of the water desired is from more than one stream, lake, spring or other body of water, separate applications must be made out for each source; provided, however, that when the numerous sources have their confluence above the point of diversion one application will serve to appropriate the water, by giving the name of the main atream at the point of diversion. The application should state the name of the stream, including its tributaries.

Under Question No. 2.—The amount of water applied for should be limited to the amount that can be put to beneficial use. The Statute provides that this amount shall not exceed three acre-feet per annum in districts where irrigation is exerted on for the six months beginning April 15 and ending October 15 of each year; and where irrigation is carried on for a longer period each year, one-half of one acre-feet per month for each additional month is the maximum quantity allowed. Therefore, there shall be allowed, a continuous flow of one accord-foot of water for each one thundred acres of land firigated. The amount about the stated in cubic feet per second loptend of in miners' inches. (One cubic foot per second equals forty miners' inches.) (One acre-foot of water is equal to 43,550 cubic feet, or the amount of water necessary to cover an acre of ground one foot deep.)

Under Question No. 3.—Ordinarily only one use of water can be named in each application. If domestic purposes is included, however, two uses can be named. For instance, if the application stated "For Irrigation and Domestic Purposes" it shall be allowed; but if "Power and Irrigation" are named in one application it shall not be allowed, but the application will be returned for correction.

Under Question No. 4—The point of diversion should be tied to some definite and fixed monument or object.

Under Question No. 4—The point of diversion is one of vital importance in the application, as upon the location of the point of diversion depends the question of interference with prior rights. The point of diversion must be stated as being within the forty-acre legal subliviation, or, if on uncurveyed land, it must be tied by the course and distance to the nearest corner of a legal advisation, of such corner is within alx miles. If no corner is found within alx miles, the point of diversion should be tied to some definite and fixed monument or object.

Except under special conditions, there shall be accepted only one point of diversion in each application, for the reason that an entire stream could be covered by one application if more than one point of diversion were permitted to be named in each filing. In cases where the diversions, if there he more than one, are on the same 40-acre tract, and are required to economically handle the water, the application for more than one point of diversions will be considered. sion will be considered.

Under Question (a)—The total number of acres of land should be stated with reasonable accuracy. The quantity of water allowed in the endorsed therean by the State Engineer, is determined by the number of acres to be irrigated as well as the amount of unappropriated water the contract of the contract o

Under Question (b) ... There should be given a description of the land to be irrigated by legal subdivisions. In the event that the land proposed to be irrigated is unsurveyed, then give the approximate location of such land, together with the township and range wherein such land is situated.

Under Quastion (c)-Give the time when the use of water for irrigation purposes will begin, and also when it will end.

Under Quastion (d)—If the application is for power purposes, give the theoretical horsepower to be developed, and the vertical head under which the power is to be developed.

Under Question (s) - If application for power or stock watering purposes, give a description of the location of the proposed works, by legal risions, or tile by course and distance to a section corner, as required in answer to Question 4 above.

Under Question (f) ... Where water applied for is to be returned to the stream, give a description of the proposed point of return, as described in answer to Question 4 above.

Under Question (p)-State number and kinds of animals to be watered at place of use.

Under Question (h)—Cive time when use of water for stock watering purposes will begin and when it will end.

Under Description of Proposed Works—Under description of proposed works, state by what means the water is to be diverted from the stream, whether by dams, ditches, pipe lines or other conduit. Give the size of such ditches, pipe lines, etc., and the proposed grade that each will have from the point of diversion, to enable this office to determine the capacity of each. The size of the ditch should be consistent with the amount of water applied for under Question No. 2.

If the water is to be stored in a reservoir, give its location with reference to the legal subdivision or subdivisions. If the reservoir is to be located on unsurveyed lands, the rules and regulations of the Department of the Interior should be followed precisely. Such rules and regulations are embodied in a pamphilet fornished by the Department of the Interior, called "Regulations Concerning Right of Way. Over Public Lands and Reservoirs," approved by the Secretary of the Interior, June 6, 1808. 'The maps and field notes of such reservoir should conform strictly with these regulations and a copy filed with the effect of the State Engineer.

Applications for permit to story made with the source of the coast angineer.

Applications for permit to store water shall conform with the above rules, except that the description of the lands to be irrigated shall not be required. If, however, the description of the lands is known and can be listed, the number of acres and location should be given.

The application shall bear the signature of the applicant, his agent or attorney.

### FEES

The following fees shall be collected by the State Engineer in advance, and shall be accounted for and paid by him into the General Fund of the State Treasury, on or before the 10th day of each month; provided, however, that the fees named in subdivision (c) of this list shall not apply to permits for underground waters:

- (a) For examining and filing an application for permit to appropriate water, twenty dollars (\$20), which shall include the cost of publication, which publication fee is hereby fixed at twelve dollars and fifty conts (\$12.50).
- (b) For examining and filing an application for permit to change the point of diversion, manner of use, or place of use, twenty-five dollars (\$25), which shall include the cost of permit should the same issue thereunder, and the cost of publication of such application,
- (e) For issuing and recording permit to appropriate water for irrigation purposes, ten cents per acre for each acre to be irrigated, up to and including one hundred acres; and five cents for each acre in excess of one hundred acres, up to and including one thousand acres; and three cents for each sere in excess of one thousand acres.
- (d) For issuing and recording permit for power purposes, five cents for each theoretical horsepower to be developed; and for issuing foul cer-tificate under permit for power purposes, twenty-five cents for each theoretical horsepower to be developed up to and including one hundred horsepower; and twenty cents for each horsepower in excess of one bundred borsepower up to and including one thousand horsepower; and fifteen cents for each horsepower in excess of one thousand.
- (e) For issuing and recording permit to store water, twenty-five dollars (\$26), and for issuing final certificate under permit to ators water, five cents for each acre-loot of water stored up to and including one thousand acre-feet; and three cents for each scre-foot in excess of one th
- (f) For issuing and recording percelt to appropriate water for any other purpose, \$10 for each second-foot of water applied for, or fraction
  - (g) For filing secondary permit under reservoir permit, \$5; for approving and recording permit under reservoir permit, \$5,
  - (h) For filing proof of commencement of work, \$1.
  - (i) For filing proof of completion of work, under any permit, \$1. .
  - (j) For filing any protest, affidavit, or any other water-right instrument or paper, \$1.
- (k) For making copy of any document recorded or filed in his office, \$1 for the first hundred words, and 20 cents for each additional one hundred words or fraction thereof; where the amount exceeds \$5, then only the actual cost in excess of that amount shall be charged.
  - (1) For certifying to copies of documents, records or maps, \$1 for each certificate.
  - (m) For blue-print copy of any drawing or map, 15 cents per square foot.
  - (n) For such other work as may be required of his office, actual cost of the work.

No instrument will be received for filing in the State Engineer's office, upless the fee for recording the same, as above provided, shall accomsuch instrument. In cases where no fee accompanies the instrument tendered for filling, such instrument shall be returned to the sender forthwith.

Where copies of any instrument of record in the office of the Stats Engineer is desired, a sufficient amount to cover the approximats cost of the same must be forwarded with the application for such copies. When such copies are prepared, any surplus over and above the statutory cost for copying such instrument or instruments shall be returned to the party requesting such copies.

Remittances should be made by draft or postal or express money order payable to the order of the State Engineer. Carson City, Nevads. Where personal checks are sent, certification by the bank upon which they are drawn is required. Foreign checks, in addition to certification, must include the exchange charge of the local bank,

The State Engineer reserves the right to hold all applications, accompanied by uncertified checks for filing fees, without filing, until collection is made on such thecks.

### Remarks:

Problem of demplois,

This application is for the right to store waters of the Truckee River in Lahontan Reservoir and is in addition and supplemental to all of the rights now owned, held or acquired by the United States in and to the Truckee River and its tributaries.

This applicant intends to raise the control level of the Lahontan Dam 8 feet and thereby increase its storage capacity and additional 100,000 acre feet, making a total capacity of said Reservoir of 394,000 acre feet.

This application is made without any prejudice to the rights now held and acquired by the United States and/or the applicant and is expressly made additional and supplemental to such rights. The water proposed to be stored will be used in connection with and supplemental to the present rights of the United States and the applicant in the same manner and through the same system of works that waters of the Truckee River and its tributaries are now diverted, stored and used in the Newlands Reclamation Project, in the Counties of Churchill, Lyon, Storey and Washoe, State of Nevada.

The applicant hereby expressly waives, any claim of senior or prior right it may obtain by this application as against any upstream storage development hereafter jointly made on the Truckee River or its tributaries by the applicant and the Washoe County Water Conservation District or other organization of water users of the Truckee River.

### DESCRIPTION OF PROPOSED WORKS

	In to be abound to measurable to change to a change to the state of th
	is to be stored in reservoirs, it should be so stated and the location of the reservoir should be given with reference to the legal subdivisions.

### INSTRUCTIONS TO APPLICANTS

Applications should be made out in detail on the form prescribed by the State Engineer.

Applications should be typewritten or filled out with ink.

An application is not a permit to appropriate water until after its approval by the State Engineer. Upon approval (or rejection) of any application, a copy of the original application with such approval or rejection endorsed thereon, will be returned to the applicant. The terms of the permit will show on the endorsement, and be a guide for the applicant.

The following rules should be complied with in making application:

Under Question No. 1—Where the source of the water desired is from more than one stream, lake, spring or other body of water, separate applications must be made out for each source; provided, however, that when the numerous surces have their confluence above the point of diversion one application will serve to appropriate the water, by giving the name of the main stream at the point of diversion should state the name of the stream, including list tributaries.

Indee Operation No. 2—The application about the stream including list tributaries.

of diversion. The application should state the name of the stream, including lis tributaries.

Under Question No. 2—The smount of water applied for should be limited to the amount that can be put to beneficial use. The Statute provides that this amount shall not exceed three acre-feet per annum in districts where irrigation is carried on for the six months beginning April 15 and ending October 15 of each year; and where irrigation is carried on for a longer period each year, one-half of one acre-foot per month for each additional month is the maximum quantity allowed. Therefore, there shall be allowed a constitution of sow of one second-foot of water for each one hundred acres of lead irrigated. The amount abould be stated in cubic feet per second lustend of in miners' inches. (One cubic foot per second equals forty miners' inches.) (One acre-foot of water is equal to 43,550 cubic feet, or the amount of water necessary to cover an acre of ground cope foot deep.)

Under Question No. 3—Ordinarily only one use of water can be named in each application. If domestic purposes is included, however, two uses can be named. For instance, if the application stated "For Irrigation and Domestic Purposes" it shall be allowed; but if "Power and Irrigation" are named in one application it shall not be allowed, but the application will be returned for correction. In certain cases where water is to be stored in a reservoir, and where the water is conveyed from the reservoir in a detch owned by the same party, two uses, "Power and Irrigation," might be named, where power can be generated from the ditch, but in such cases it must be clearly shown how the two uses can be completed.

Under Question No. 4—The point of diversion is one of vital importance in the application, as upon the location of the point of

Under Question No. 4—The point of diversion is one of vital importance in the application, as upon the location of the point of diversion depends the question of interference with prior rights. The point of diversion must be stated as being within the forty-acre legal subdivision, or, if on unsurveyed land, it must be tied by the course and distance to the nearest corner of a legal subdivision, if such corner is within six miles. If no corner is found within six miles, the point of diversion should be tied to some definite sion, if such corner is within and fixed monument or object.

Except under special conditions, there shall be accepted only one point of diversion in each application, for the reason that an entire atream could be covered by one application if more than one point of diversion were permitted to be named in each filing. In cases where the diversions, if there he more than one, are on the some 40-acra tract, and are required to economically handle the water, the application for more than one point of diversion will be considered.

Under Quarties (a)—The total number of acres of land should be stated with reasonable accuracy. The quantity of water allowed in the application, endorsed thereon by the State Engineer, is determined by the number of acres to be irrigated as well as the amount of unappropriated water in the stream.

Under Question (b)—There should be given a description of the land to be irrigated by legal subdivisions. In the event that the land proposed to be irrigated is unsurveyed, then give the approximate location of such land, together with the township and range wherein such land is situated.

Under Question (o) -- Give the time when the use of water for irrigation purposes will begin, and also when it will end.

Under Question (d)—If the application is for power purposes, give the theoretical horsepower to be developed, and the vertical head under which the power is to be developed.

Under Question (s).—If application for power purposes, give a description of the location of the proposed works, by legal subdivious, or the by course and distance to a section corner, as required in answer to Question 4 above.

Under Question (f) - Where water applied for is to be returned to the stream, give a description of the proposed point of return, as described in answer to Question 4 above.

Under Description of Proposed Works—Under description of proposed works, state by what means the water is to be diverted from the stream, whether by dams, ditches, pipe lines or other conduit. Give the size of such ditches, pipe lines, etc., and the proposed grade that each will have from the point of diversion, to enable this office to determine the capacity of each. The size of the ditch should be consistent with the amount of water applied for under Question No. 2.

If the water is to be stored in a reservoir, give its location with reference to the legal subdivision or subdivisions. If the reservoir is to be located on unsurveyed lands, the rules and regulations of the Department of the Interior should be followed precisely. Such rules and regulations are embodied in a namphlet, furnished by the Department of the Interior, called "Regulations Concerning Right of Way Over Public Lands and Reservations for Canals, Ditches, and Reservoirs," approved by the Secretary of the Interior, June 6, 1909. The maps and field notes of such reservoir should conform strictly with these regulations and a copy filed with the office of the State Engineer. the State Engineer.

Applications for permit to store water shall conform with the above rules, except that the description of the lands to be irrigated shall not be required. If, however, the description of the lands is known and can be listed, the number of acres and location should

The application shall bear the signature of the applicant, his agent or attorney.

The following fees shall be collected by the State Engineer in advance, and shall be accounted for and paid by him into the General Fund of the State Treasury, on or before the 10th day of each month; provided, however, that the fees named in subdivision (c) of this list shall not apply to permits for underground waters:

(a) For examining and filing an application for permit to appropriate water, twenty dollars (\$20), which shall include the cost of publication, which publication fee is hereby fixed at ten dollars (\$10).

(b) For examining and thing an opplication for permit to change the point of diversion, manner of use, or piace of use, twenty-five dollars (\$25), which shall include the cost of permit should the same issue thereunder, and the cost of publication of such application.

(c) For issuing and recording permit to appropriate water for irrigation purposes, ten cents per acre for each acre to be irrigated, up to and including one bundred series; and they cents for each acre in excess of one hundred acres, up to and including one thousand acres, and three cents for each acre in excess of one thousand acres.

(d) For leaving and recording permit for power purposes, five cents for each theoretical borsepower to be developed; and for issuing final certificate under permit for power purposes, twenty-five cents for each theoretical horsepower to be developed up to and including one hundred horsepower; and twenty-five cents for each twenty-five cents for each torsepower in excess of one hundred horsepower up to and including one thomsend horsepower; and fifteen cents for each

and thenly eems not teen onespower in excess of one nonared nonrepower up to and including one thousand horsepower; and fifteen cents for each horsepower in excess of one thousand.

(e) For faculty and recording permit to store water, twenty-five dollars (125), and for issuing final certificate under permit to store water, five cents for each acre-foot of water stored up to and including one thousand acre-feet; and three cents for each acre-foot in excess of one thousand.

(f) For issuing and recording permit to appropriate water for any other purpose, 310 for each second-foot of water applied for, or fraction thereof.

(g) For filing secondary permit under reservoir permit, 55; for approving and recording permit under reservoir permit, 35.

(h) For filing proof of commencement of work, 31.

(a) For filing proof of completion of work, 21.

The State Engineer reserves the right to bold all applications, accompanied by uncertified checks for Sling fees, without Sling, until collection is

The State Engineer reserves the right to hold all applications, accompanied by uncertified checks for filing fees, without filing, until collection la made on such checks.

TO OF THE PROPERTY OF THE PARTY OF THE PARTY

Remarks:

This application is for the right to store waters of the Truckee River in Lahontan Reservoir and is in addition and supplemental to all of the rights now owned, held or acquired by the United States in and to the Truckee River and its tributaries.

This applicant intends to raise the control level of the Lahontan Dam 8 feet and thereby increase its storage capacity and additional 100,000 acre feet, making a total capacity of said Reservoir of 394,000 acre feet.

This application is made without any prejudice to the rights now held and acquired by the United States and/or the applicant and is expressly made additional and supplemental to such rights. The water proposed to be stored will be used in connection with and supplemental to the present rights of the United States and the applicant in the same manner and through the same system of works that waters of the Truckee River and its tributaries are now diverted, stored and used in the Newlands Reclamation Project, in the Counties of Churchill, Lyon, Storey and Washoe, State of Nevada.

The applicant hereby expressly waives, any claim of senior or prior right it may obtain by this application as against any upstream storage development hereafter jointly made on the Truckee River or its tributaries by the applicant and the Washoe County Water Conservation District or other organization of water users of the Truckee River.

# DESCRIPTION OF PROPOSED WORKS

is to be stored in reservoirs, it should be so stated and the location of the reservoir should be given with referen	
	ce to the legal subdivisions.
